SECTION 3: TERMS OF REFERENCE

Assignment: to conduct Annual Outcome Survey (AOS) for Commercial Agriculture and Resilient Livelihoods Programme (CARLEP), Bhutan

<i>Consultancy Title</i>	<i>Annual Outcome Survey 2020</i>
<i>Starting Date</i>	<i>6 May 2021</i>
<i>Duration of Assignment</i>	<i>45 Days</i>
<i>Programme name</i>	<i>Commercial Agriculture and Resilient Livelihoods Enhancement Programme (CARLEP)</i>
<i>Location</i>	<i>CARLEP's major Program Dzongkhags (Six Eastern Districts)</i>
<i>Reports to</i>	<i>Mr. Dorji Wangchuk, Programme Director, OPM</i>
<i>Direction by</i>	<i>Mr. Karma Tenzin, (M&EO, OPM) and Sangay Choda, (PSO, OPM)</i>

1. Introduction.

The following are Terms of Reference for a consultancy for conducting AOS in the Programme area with project beneficiary and non/least beneficiary farmers through the “Commercial Agriculture and Resilient Livelihoods Enhancement Programme” (CARLEP) IFAD. This is the annual event conducted regularly through the effort of Office of the Programme Management (OPM) but the recent IFAD mission recommended management to outsource the survey to get the realistic information for the Management and funding agencies.

2. Description of the CARLEP Programme

The Commercial Agriculture and Resilient Livelihoods Enhancement Programme (CARLEP) funded through International Fund for Agricultural Development (IFAD) aims to facilitate the transformation of a subsistence-based rural agricultural economy into a sustainable value chain and market driven productive sector by promoting climate informed approaches in agriculture and strengthening capacities of communities and local institutions. The programme has focused on increased agricultural production and makes a basic shift in approach towards marketing and climate resilient farming practices. Its goal is to sustainably increase smallholder farmers’ incomes and reduce rural poverty. The objective is to increased returns to smallholder farmers through climate resilient production of crops in nationally organized value chain and marketing systems.

CARLEP was started in December 2015 and was to be completed in December 2022. However, in 2019 additional finance (AF) was approved and the completion date was extended to December 2025. The original budget was US\$14.4 million which has been increased to US\$ 25.6 million. The programme aims to support 28,975 households in Lhuentse, Mongar, Pemagatshel, Samdrup Jongkhar, Trashigang and Trashiyangtse Dzongkhags. Its goal is to sustainably increase smallholder producers’ incomes and reduce poverty through commercialization of production by programme households and the objective is increased returns to smallholder farmers through climate-resilient production of crops and livestock products in nationally organized value chains and marketing systems. The two prong approaches are commercialization of vegetable value chain and Dairy Value Chain with climate resilient promotion in the programme area.

3. Background on AOS

The annual outcome survey (AOS) is a tool for monitoring the performance of a project. It will also evaluate outcome and impact of project activities. More specifically, the AOS sets out to identify positive and negative changes at the household level to highlight evidence of where the project is achieving results and where it is lagging behind and to draw on the findings for designing corrective actions when required. AOS provides the opportunity to gather information on a large number of indicators and to compare and contrast these data from previous years. Also, it can be adjusted to measure the same layers of indicators with different target groups.

The survey is normally conducted in villages targeted by the project to receive project interventions. It will typically include both project beneficiaries and non-beneficiaries. The latter are used as a control group, providing a basis for comparison and control. This helps to filter out other explanations for project outcomes.

AOS are usually conducted annually, after second year of implementation. The survey should be undertaken in conjunction with qualitative assessments that would thereby complement the household-level data, providing information on 'why' and 'how' some outcomes were or were not achieved. To generate such data, in addition to the household interviews, the focus group discussions and key informant interviews should be conducted in parallel.

4. Scope of the assignment

The annual outcome survey should evaluate the outcome and impact of project activities at households and community level, and highlight both the positive and negative changes. It should highlight the changes as compared to previous years and also show if there is a difference between beneficiaries and non-beneficiaries' households.

The main assignment is to conduct an annual outcome survey and submit a report to the office of the programme management. The survey should collect both quantitative data and qualitative data. Quantitative data can be collected from Household Interview using structured or semi-structured questionnaires. While qualitative data is usually collected through Focus Group Discussion (FGD) and Key Informant Interview (KII). For Key Informant Interview, local government leaders (Gups, Mangmi, Tshogpa, Chupeon) or learned elder or progressive farmer or government official working in that village for long duration are interviewed.

The Objectives

The objectives of the AOS based on the collection of quantitative and qualitative data for the CARLEP in Bhutan that remain the same for every AOS can be summarized as follows:

- Measure changes happening at the households (HHs) level in terms of livelihoods, food security, female participation in project activities and market access during the project cycle.
- Provide timely information necessary to undertake corrective actions and plan interventions.
- Provide information and definitive pathways for planning an effectual strategy and operation models for better results and outcomes and more efficient use of resources.

The assignment

The assignment will cover the following key activities:

- Prepared inception report (or workplan) and submit to OPM
- Study the Project Log frame and identify key indicators for the outcome and impact assessment
- Develop a set of semi-structured or structured questionnaires
- Discuss the indicators and questionnaires with M&EO and review as per the recommendation
- Collaborate with OPM on sampling methods and sample population list, and conduct household sampling
- Pre-test the questionnaires and train all enumerators
- Conduct the Household Survey, Focus Group Discussion and Key Informant Interview
- Analyze the data, and compare it with previous years data
- Write a report and submit to OPM for review
- Present the findings to OPM with recommendation
- Finalized the AOS report as incorporating feedbacks and comments from OPM

5. Deliverables

The consultant firm has to deliver:

- Inception report, with a short summary, completed reviews on the survey design, work plan and annexes [*can be sufficed with technical proposal*]
- Detailed and professional reporting that addresses both the overall and specific objectives of the survey, and which includes specific recommendations. (*in softcopy and 2 hard copy*)
- All datasets generated as a result of the study, including raw data set
- Present survey result to OPM

6. Duration and Timeframe

The final outputs should be delivered by **21st June 2021**.

7. Study Methodology

The framework for Annual Outcome Survey can be designed based on Technical Guideline Note prepared by the International Fund for Agriculture Development (IFAD). The survey should conduct both the qualitative and quantitative assessment of major project activities. Household Interview should be used to collect quantitative data while qualitative data can be acquired through Focus Group Discussion (FGD) and Key Informant (KI) Interview. This means that in each cluster, in addition to the household interviews, the survey team must conduct one FGD and few key informant interviews.

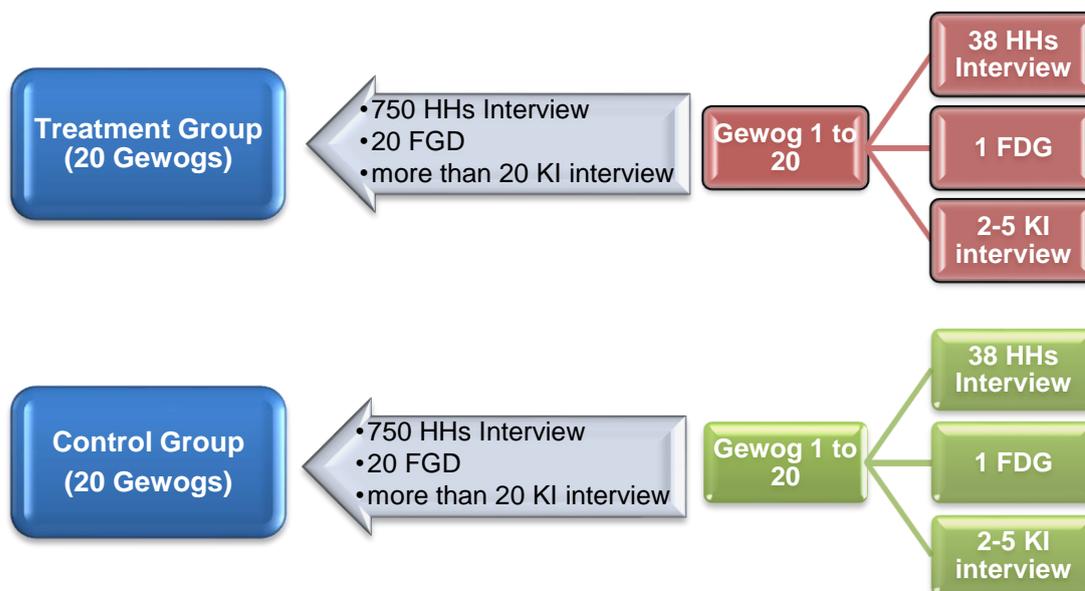

Figure 1. Study Design

8. Sampling Size:

As per the general rule of thumb, as indicated in IFAD's Core Outcome Indicators (COI) Measurement Guideline, it is expected to survey **at least 750HHs from treatment group and 750HHs from control group.**

9. Reporting Arrangements

- The consultant will report through the M&EO to Programme Director of CARLEP
- Project Support Officer (PSO) and Knowledge Management Officer (KMO) will monitor the activities regularly.

10. Financing and Payment Schedule

The assignment will be financed under the Commercial Agriculture and Resilient Livelihoods Enhancement Programme (CARLEP).

The LUMP-SUM payment will be made after the approval of the final report and all related documents as per the contract.
